

NAT

NAT is a group of **polyester based** yarns, **produced by spinning, air texturing and twisting** technologies which **aims** to convert a synthetic material to a **natural look and touch** yarn.

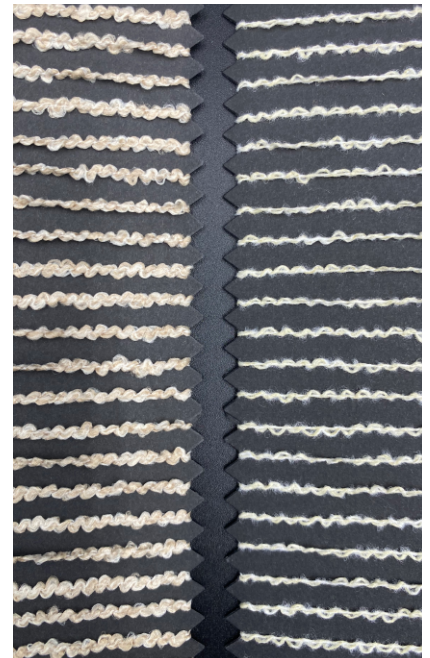

BASE COLORS

There are **48 unicolors** of NAT.

The **feed yarn** is **300/144, 150/72, 75/36 FDY SD**.

NAT is **produced in hundreds of multicolors** and **various counts**.

NAT yarns are **produced as unicolor or multicolor** with available **counts from 150 to 6000 deniers**.

**The photos might differ from the real color.
Please request the color card.*

**NAT provides a range of unicolor or melange products in various qualities.*

NEW COLORS

There is an option to request **new colors** with the **minimum order quantity** of **2 tons per color**.
